

Program Manager with more than 40 years of experience managing and performing oversight for all aspects of environmental programs in the United States to include National Environmental Policy Act (NEPA), Natural and Cultural Resources, Resource Conservation and Recovery Act (RCRA), Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA), Pollution Prevention (P2), Emergency Planning and Community Right-to-Know Act (EPCRA), Spill Prevention Countermeasure and Contingency (SPCC) and Stormwater Pollution Prevention (SWPP) planning. Established a Geographical Information System (GIS) Enterprise for the Rhode Island Army National Guard and guided the leadership in Sustainability initiatives. Mr. Boyes served on the Environmental Advisory Council for the National Guard Bureau and in that capacity also served as the Chairman of the NEPA Committee. In more recent years Mr. Boyes has expanded on his wealth of NEPA expertise by attending International Impact Assessment workshops where he has focused on Cumulative impacts at the Strategic level as well as providing for the true integration of Social, Economic and Health concerns into the Impact analysis process. He has actively engaged with representatives of the major lending Banks as they seek to meet the mounting challenges of performing impact analysis in the highly informed societies of the digital age. He assisted the World Bank in a capacity building exercise in Latin America for the offshore oil and gas industry where US consultants instructed Uruguayan officials in offshore emergency response measures and the U.S. regulatory framework. Mr. Boyes has received training from the International Center for Hydropower, the International Hydropower Association, the Inter-American Development Bank, the World Bank and the IFC on Social Impact Analysis and the sustainable development of Hydropower and Mega Infrastructure in Latin America. Most recently he presented on Dam Safety requirements in the United States and Strategic Alliances & Investing for Success in the Latin American hydropower industry to a group of International practitioners attending an ICH workshop in Argentina.
